Job title: Project Manager Earth Observation Projects (m/f/d)

About Marble Imaging

We will disrupt the European Earth Observation industry by developing our own satellite constellation and cutting-edge AI supported analytics. Marble Imaging is a German NewSpace company, combining engineering, aeronautics & Earth Observation to address global challenges from security, sustainability, climate adaptation and disaster resilience. We aim to provide these EO based analytics and insights by developing and operating our own constellation of very high-resolution multispectral satellites providing up to hourly revisits of areas of interest by the end of 2028. We are a fast-growing and diverse team, comprised of highly motivated professionals from various backgrounds. We share a common vision to make EO more accessible and understandable so that EO data can be incorporated into rapid decision making in every part of our global world.

About the position: To strengthen our team, we are looking for an experienced Project Manager for Earth Observation Projects (m/f/d). In this role, you will be responsible for the organizational, administrative, and business management of projects in the field of Earth Observation (EO). You will serve as the central point of contact between clients, partners, technical teams, and management, ensuring that projects are implemented on time, within budget, and in accordance with agreed-upon quality standards.

This position is intended for candidates with a background in the EO space sector or the EO downstream sector who see their strengths particularly in project management, project coordination, and administrative tasks.

This position is intended for candidates with a background in the EO space sector or the EO downstream sector who see their strengths particularly in project management, project coordination, and administrative tasks.

Location – Attendance in the Bremen office is required. Is it possible to do partial remote work or work from home.

The role

Your role would include the following topics:

- Planning, managing, and monitoring Earth observation projects throughout the entire project lifecycleCollaboration on press releases
- Coordinating internal and external project stakeholders and managing interfaces with customers, partners, and clients
- Creating and maintaining project plans, schedules, resource overviews, and risk registers
- Organizing and facilitating project meetings, as well as tracking actions and decisions
- Establishing contract, proposal, and documentation management systems
- Preparing project reports, status updates, and management presentations
- Monitoring project budgets, milestones, and key performance indicators

- Conducting audits and reviews, and ensuring compliance with quality and regulatory requirements
- Contributing to the further development of project management processes and best practices
- Playing a leading role in the preparation and execution of national and international grant-funded and space projects

About You

- Bachelor's or master's degree in a technical field
- Several years of professional experience in Earth Observation, Space, or EO downstream
- Good knowledge of the EO market, relevant stakeholders, and typical data and service offerings
- Demonstrable experience in project management or project coordination
- Strong organizational skills and a structured, independent work style
- Experience with administrative project tasks, reporting, budget tracking, and document management
- Proficiency in using project management tools (preferably OpenProject) and standard Microsoft Office applications
- Excellent communication and coordination skills
- Business-level proficiency in spoken and written English; strong command of German
- Certifications such as PRINCE2, PMP, or comparable qualifications are a plus but not required

What We Offer You Here at Marble Imaging

- Opportunities to contribute to innovative projects in Earth observation and space exploration
- International collaboration with leading partners from industry, research, and the public sector
- A high degree of autonomy and the opportunity to shape your work
- Flexible work hours and modern work models
- Personal and professional development
- A dedicated and interdisciplinary team with extensive expertise in the Earth observation field
- A VSOP (Virtual-Stock-Options-Program) program

At Marble Imaging, we are committed to fostering an inclusive and welcoming workplace. We believe that diverse voices bring diverse perspectives that fuel innovation, creativity, and the ability to tackle global challenges effectively. We encourage individuals of all races, ethnicities, genders, sexual orientations, abilities, and backgrounds to join us in our mission to change the EO world. We are an equal-opportunity employer.

Join us on our mission to explore and reimagine the possibilities of VHR EO based analytics and help us tackle global challenges. If space is the final frontier, you will be getting one step closer to reaching it with Marble Imaging. Contact us for questions and information at recruiting@marble-imaging.de
